Malone Aids Hoover.

Not in proclaiming more meatless days, but in helping to supply the demand.

From November the 8th. to January 20th. G. A. Malone of the Olive vicinity killed and sold \$200.00 worth of rabbits \$82.00 of which he made in two weeks.

This not only adds to the meat supply, but is a substantial addition to a bank account that would otherwise have been diminishing during the winter months while the calf crop is coming on.

A number of people in this part of the country have killed rabbits as a winter side line for years, still there are enough of the little animals that are entirely worthless while living left to destroy annually enough grass to feed a nice herd of cattle.

CORN! CORN! OATS! OATS!

I have a car of corn and oats which has just arrived and will save you money on this kind of feed. Will appreciate your patronage.

A. G. Pirtle.

The Department of Agriculture has also advised the Senator that they have available a small amount of Kansas Alfalfa, Feterita, White Milo and Sudan Grass seed. These seeds are for experimental purposes and are furnished with the understanding that the recipient will report the results. Each package contains a sufficient quantity of seed for a satisfactory field test, and in view of the limited supply not more than one package of any variety can be furnished to an individual. The Senator will be glad to honor all requests so long as the supply is available.

Mrs. M. A. McLandless left the first of the week for Artesia to visit her daughter Mrs. John Mims and family.
